INCIDENT DETAILS		Incident Description	Water well is contaminated & hissing methane gas. Last testing from Cabot showed well was at a 20% saturation. Well water is brown & smells like pond water. Children (daughter) cannot shower & have gotten rashes, hives & eczema (frack rash) & dogs (pets) throw up after drinking the water. Cabot currently provides drinking water but if the Moratorium b/w Cabot & PADEP is passed (as of 10/17/2011). Cabot will no longer supply water & they can't honor their contract with the residents of Dimock, PA. PADEP will not respond & have hung up on me. Cabot also initially installed a filtration system in the basement of their home that failed & currently there is a PVC pipe that contains one inch of crystals (salt-like) around the pipe from the contaminants.
